

Diving into Dinosaurs

- 
1. Dinosaurs first appeared about million years ago and became extinct about million years ago.
 2. The dinosaur fossils found so far in New Zealand indicate that the NZ animals lived about million years ago.
 3. Name the first dinosaur found in New Zealand.
 4. When was it officially identified as being a dinosaur?
 5. When did the land we now call New Zealand break away from Gondwanaland?
 6. Name two marine reptiles which lived in New Zealand at the time of the dinosaurs.
 7. Why are there no teeth at the front of the Dryosaur's mouth?
 8. Name the two reasons suggested in the wall displays as to why the dinosaurs may have died out.
 9. Name an extinct bird that once lived in New Zealand?
 10. Why do you think this bird became extinct?
